Introduction...

FooDelicious

❖ From swanky upscale restaurants to the cosiest hidden gems serving the most incredible food, FooDelicious covers it all. Find your next meal.

  🞣 We have used basically, HTML5 and CSS3 for designing, styling   and giving a proper content to our website and have used basic JavaScript to make a functionality on Login page and also to home page for basic function like smooth scroll, Slider.

✓ We have divided our "FooDelicious" website into following modules/sections: -

  ➢ Home
  ➢ About
  ➢ Menu
  ➢ Dinning_area
  ➢ About_Us
  ➢ Contact Us

Flow Of links

Home Page	*The Main Page of Website.
Login Page	*Login To Have an entry On next page.

Different Modules of Website.

1. Home Page

- ✓ This module of website consists of Restaurant Name on the left-hand side and the following navigation bars: HOME, ABOUT , MENU,DINNING_AREA, ABOUT US AND CONTACT US.

✓ When the client clicks on any of the following navigation bar the page will be directed to that specific module of specific ID.

- A Special and silent feature of website and one interesting onclick gesture will redirect you to a new Secret page.

2. About US.

Home   About   Menu   Dinning_area   About_us   Contact

About Us

In our world, real food ; real flavor as tried love : true love. And we have a lot of love to share.

For guests. For food. For community. And, last but not least, for big Mama Earth.

Since opening our first restaurant in 2008, Edible Beats has grown into a family of six restaurants— Linger, Ophelia's, Vital Root, El Five & the two R's, Root Down and Root Down DIA.

➢ The Basic About page consists of divisions contains png files and text section.

3. MENU

- The basic CSS is used to for alignment and background attachment is fixed used here.

- This contains the menu with 6.png And a VIEW ALL CLICKABLE BUTTON.

- On clicking on VIEW ALL BUTTON it will redirect you to home page.

- A slider JavaScript file is linked to this section to have such effect of slider.

- By changing the value of this variable, we can easily change the alignment and style of slider to have a different view.
